## **Introduction**

The District Improvement Plan (DIP) has been designed to provide schools and districts with a common planning template that addresses student learning and system needs that have been identified through the schools' Comprehensive Needs Assessment.

# **Improvement Plan Stakeholder Involvement**

## **Introduction**

The responses should be brief, descriptive, and appropriate for the specific section. It is recommended that the responses are written offline and then transferred into the sections below.

## **Improvement Planning Process**

### Improvement Planning Process

**Describe the process used to engage a variety of stakeholders in the development of the institution's improvement plan. Include information on how stakeholders were selected and informed of their roles, and how meetings were scheduled to accommodate them.**

Our District Improvement Team is called our Instructional Council. This team reviews goals, programs, and curricular changes. This group has existed for over 10 years in Caledonia. The team consists of one-two teacher leaders from each school and one administrator from each school. IC meets 3-4 times per year for District Improvement planning as well as textbook adoption approval. IC is charged with completion of the DSS, PET and DIP. Parents are involved in the process through Key Communicator meetings. Content area teams met one day to develop the district goals based upon data review.

**Describe the representations from stakeholder groups that participated in the development of the improvement plan and their responsibilities in this process.**

Participants represented their grade level and school in discussions about perceptions and realities of curriculum, instruction, assessment, and professional development. The District Improvement Plan was reviewed and revised during the Instructional Council meetings with input from teachers and administrators. The input from the building level School Improvement Plans, Instructional Council team, Core Content Area teams, Administrative team, and Central Office team will be combined to develop a final District Improvement Plan. This plan will be shared with all stakeholders for final review prior to final approval.

**Explain how the final improvement plan was communicated to all stakeholders, and the method and frequency in which stakeholders receive information on its progress.**

The final plan will be emailed to each participant for their review. We will communicate progress and gather input at each meeting throughout the year to influence amendments and processes for the next school year.

8	All teachers and principals will implement Professional Learning Communities	Objectives: 1 Strategies: 1 Activities: 1	Organizational	\$0

# Goal 1: All students at Caledonia Community Schools will become proficient in Reading.

## Measurable Objective 1:

75% of Third, Fourth, Fifth, Sixth, Seventh, Eighth, Ninth, Tenth and Eleventh grade students will demonstrate a proficiency in Reading in English Language Arts by 06/30/2018 as measured by M-Step.

## Strategy 1:

Differentiated Instruction-Reading - All teachers and support staff will implement strategies of differentiated instruction for reading proficiency according to the needs of the students. Differentiation will include instruction in the 5 strands of reading including phonemic awareness, phonics, vocabulary, fluency and comprehension. Differentiation will also include technology integration. Instructional strategies that have large effect size on school districts include differentiated instruction, informative assessments, and student engagement. Teachers will implement these to increase achievement for all students including students with disabilities and free/reduced students.

Teachers from grades Pre-K through 12 will meet 3-4 days per year to review the current curriculum to align content across all grades. Action plan items for 2015-2016 include:  1. Communication Plan Development: Two way communication plan to be developed to allow for input from all stakeholders. 2. Determination of current enacted curriculum which will be used to support any curriculum changes. 3. Next Generation Science Standards transition planning if applicable due to timelines of MDE adoption. If adopted, the team will review labs, activities and Science Kits for each grade level. Differentiated Instruction using MAISA	Teachers and support staff will implement instruction that differentiates learning for students identified as not meeting benchmarks as indicated by the building school improvement plan. Teachers will engage in professional development activities to increase their knowledge of best practices in writing instruction. Teachers will use pacing guides aligned with the common core state standards to assist in identifying benchmarks and standards.. These standards will assist in determining the differentiation needed for students not meeting the standards. Teachers will use common assessments and anchor papers to collect benchmark data. During the 2015-2016 school year teachers will be asked to teach 3 MAISA units with the expectation that all of the elementary schools will come to a consensus to see if MAISA will be the writing curriculum. ## District Improvement Plan

Caledonia Community Schools

District Content Team- Science	Teachers from grades Pre-K through 12 will meet 3-4 days per year to review the current curriculum to align content across all grades. Action plan items for 2015-2016 include:  1. Communication Plan Development: Two way communication plan to be developed to allow for input from all stakeholders. 2. Determination of current enacted curriculum which will be used to support any curriculum changes. 3. Next Generation Science Standards transition planning if applicable due to timelines of MDE adoption. If adopted, the team will review labs, activities and Science Kits for each grade level. Data Analysis Trainings/NWEA MAPS	Teachers and administrators for grades K-8 will be trained in the generation and use of student and classroom data reports for the NWEA MAPS assessment in reading and math. This data will be used in the MTSS implementation as part of the Grade Level Problem Solving process (Tier 1), Benchmark and Progress Monitoring Meetings (Tier 2) and Student Assistance Team (Tier 3). The data report training will also include information regarding parent reports which can be shared with families to support their understanding of their child's progress in the curriculum. The trainings will be for all teachers in October and February using their actual student data from Fall and Winter Benchmark assessments. The 2017-2018 trainings are the second and third trainings in a series and will focus on Goal Setting and Instructional Ladders.
