September 26, 2019

To Caledonia School's Community,

The Kent County Health Department has just informed us that the EEE virus (Eastern Equine Encephalitis) has been detected in a deer carcass found in Kent County. The exact whereabouts has not been released. No human cases have been identified in Kent County, however, "state health officials are encouraging people in Kent County to postpone, reschedule or cancel outdoor activities happening at or after dusk, particularly any events involving children."

Since we just received this news, we are in the process of reviewing evening events and will make changes to those various outdoor evening events and athletic competitions. These specific changes will be communicated by the school or athletic departments as soon as possible. We appreciate your patience as we work through the details.

We will keep you informed as soon as we have more information.

Sincerely,

A handwritten signature in black ink that reads 'Dr. Dedrick Martin'.

Dr. Dedrick Martin, Ed.D.
